

CNC Machining

SLP (UK) LIMITED
LIGHTING & CEILING COMPONENTS

SLP (UK) Ltd's recent purchase of a CNC Router means that we are now able to offer a precision cutting / machining service to satisfy all your needs in house! At SLP (UK) Ltd our CNC Router ensures repeatable and reliable accuracy with an edge finish to our plastic sheet that is of the highest quality. We can cut panels to whatever size you require from 2.45 x 1.25m master sheets providing a swift and reliable service.

The CNC Router system incorporates a specially designed extraction system that eliminates the swarf at the point of cutting to give a clean, dust free finish.

Standard Features

Elte 5 HP spindle (6000 – 24000 RPM), Complete with swarf pick-up, Industry proven Camtech advanced machine, controller. Machine side Sub Console for machine, operations, Vacuum Ready Aluminium T-slot - bed, Welded steel frame, 150mm Z-Axis Clearance, Linear profile bearings, Ballscrew Z axis

Services we can provide:

Precision Cutting Of Shapes

Simply by sending us your drawings or plans we can accurately cut any shape you desire from our wide range of stocked materials. Our specialist optimisation software ensures the best utilization of our master sheets keeping your costs as low as possible.

Machining Holes & Features

From your drawings or plans we can not only cut whatever shape you require but can also machine holes and features into your panels.

Special Tolerance Cutting

Using our highly accurate CNC Routing machine we can offer a specialist service allowing us to cut your plastic panels to a tolerance of +/-0.25mm. Please feel free to contact the sales office for further information regarding any of the services listed above.
