Cast Design Satin Acrylic Sheet

Satin Finished Cast Acrylic (PMMA) Sheet is a new development and is especially suited for use within high quality lighting fixtures. It is offered in either 3 mm or 5 mm depths and in both clear and opal finishes.

The satin finish on both surfaces gives the sheets a similar effect to that given by “light sand blasting”. Cast Design Satin Sheets offer much higher quality feel to extruded sheet whilst still remaining affordable for the higher end of the market. Sheets are offered cut to size or in the full sheet sizes detailed below.

	Smooth Sheet
Material	Acrylic PMMA
Pattern	Satin - Double sided
Thickness	3 - 5 mm
Tolerance on Thickness	10%
Weight per M2	3 mm 3.5 kg 5 mm 5.95 kg
UV Stability	Good
Impact Resistance	Medium
Vicat Temperature	115 C
Max Operating Temp.	80 C
Colours Available	Clear Opal (Special Order)
